Verification that a Safety Data Sheet (SDS) is Not Required

Cardinal Health requires that an up to date Safety Data Sheets be provided during the initial setup for ***each and every item containing a hazardous chemical*** in accordance with 29 CFR 1910.1200. SDSs provide important information that Cardinal Health Quality and Regulatory Affairs utilizes for verification of proper storage, handling, transportation and disposal of merchandise based on OSHA, ICAO, TDG, IMDG, DOT and EPA regulations. An OSHA exemption for a SDS does not eliminate the requirement to review product characteristics and assure compliance with federal transportation and environmental regulations.

Many Cardinal Health suppliers use exceptions for "Drugs" or "Cosmetics" as defined by the Federal Food, Drug, and Cosmetic Act and "Articles" as defined by OSHA in 29 CFR 1910.1200(c) that *in certain situations* provide relief from SDS requirements. In these situations, the below information is required to be supplied:
