SECTION 1: IDENTIFICATION	
1.1 Product identifier	
Product name	Carprovet® (carprofen tablets) Caplets
Chemical name	carprofen
Synonyms	C <sub>15</sub> -H <sub>12</sub> -Cl-N-O <sub>2</sub> ; 9H-carbazole-2-acetic acid, 6-chloro-alpha-methyl-, (+/-)-;
	dl-6-chloro-alpha-methylcarbazole-2-acetic acid; C-5720; Carprofena;
	Imadyl; Rimadyl; NSAID; anti-inflammatory/ analgesic
Proper shipping name	Medicine, solid, toxic, n.o.s. (contains carprofen)
Chemical formula	C <sub>15</sub> -H <sub>12</sub> -CI-N-O <sub>2</sub>
Other means ofidentification	Not Available
CAS number	53716-49-7
1.2 Relevant identified uses of the	e substances or mixture and uses advised against
Recommended uses	For the relief of pain and inflammation associated with osteoarthritis and for
	the control of postoperative pain associated with soft tissue and orthopedic
	surgeries in dogs; for professional use only. Federal law restricts this drug
	to be used by or on a order of a licensed veterinarian.
	This SDS is written to address potential worker health and safety issues
	associated with the handling of the mixture

## **SECTION 2: HAZARDS IDENTIFICATION**

### 2.1 Classification of the substance or mixture

Safety Data Sheet according to OSHA HazCom Standard (2012) requirements (GHS.USA)

### NFPA 704 diamond

Note: The hazard category numbers found in GHS classification insection 2 of this SDSs are NOT to be used to fill in the NFPA 704 diamond. Blue = Health Red = Fire Yellow = Reactivity White = Special (Oxidizer or water reactive substances)

# Classification

Acute Toxicity (Oral) Category 3, Sensitisation (Skin) Category 1, Hazardous to the Aquatic Environment Long-Term Hazard Category 2

5.3 Special protective actions for fire-fighters:			
Firefighting			
	available, spillage from entering drains or water course. Use fire fighting procedures		
	suitable for surrounding area DO NOT approach containers suspected to be hot. Cool		
	fire exposed containers with water spray from a protected location. If safe to do so,		
	remove containers from path of fire.		
Fire / explosion	Product itself is not explosive, but dust clouds suspended in are can be explosive.		
hazard	Hazardous conditions will not occur under normal conditions. Combustion products		
	include: carbon monoxide, carbon dioxide, hydrogen chloride, phosgene, nitrogen oxides		
	and other pyrolysis products typical of burning organic material. May emit poisonous fumes.

SECTION 6: ACCIDENTAL RELEASE MEASURES		
6.1 Personal pred	cautions, protective equipment and emergency procedures	
See Section 8	• • • • • • • • • • • • • • • • • • • •	
6.2 Environmenta	al precautions	
See Section 12	2	
6.3 Methods and r	naterial for containment and cleaning up	
Minor spills	with skin and eyes. Wear protective clothing, gloves, safety glasses and dust respirator. Use dry clean up procedures and avoid generating dust. Vacuum up or sweep up. NOTE: Vacuum cleaner must be fitted with an exhaust micro filter (HEPA type) (consider explosion-proof machines designed to be grounded during storage and use). Dampen with water to prevent dusting before sweeping. Place in suitable containers for disposal.	
Major spills	nature of hazard. Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or water course. Stop leak if safe to do so. Contain spill with sand, earth or vermiculite. Collect solid residues and seal in labelled drums for disposal. Wash area and prevent runoff into drains.	
Personal Protectiv	ve Equipment advice is contained in Section 8.	

SECTION 7: HA	SECTION 7: HANDLING AND STORAGE				
7.1 Precautions	for safe handling				
Safe handling	Avoid all personal contact, including inhalation. Wear protective clothing when risk of exposure occurs. Use in a well-ventilated area. <b>DO NOT</b> enter confined spaces until atmosphere has been checked. <b>DO NOT</b> allow material to contact humans, exposed food or food utensils. Avoid contact with incompatible materials. When handling, <b>DO NOT</b> eat, drink or smoke. Keep containers securely sealed when not in use. Avoid physical damage to containers.				
Other information	This SDS is for a pharmaceutical agent - Handling of this product in its final form presents minimal occupational exposure risk. In an occupational setting, handle in accordance with good industrial hygiene and safety procedures. Avoid contact with eyes, skin and clothing. Avoid breathing dust. Use appropriate personal protective equipment when handling and observe good personal hygiene measures after handling.				
7.2 Conditions for	or safe storage, including any incompatibilities				
Suitable container	Comply with applicable regulations. Store in a dry, cool and well-ventilated place. Keep container closed when not in use. Keep/Store away from direct sunlight, extremely high or low temperatures and incompatible materials.				
Storage incompatibility	Avoid reaction with oxidising agents.

Notes:	Occupational exposure banding is a process of assigning chemicals into specific categories or bands based on a chemical's potency and the adverse health outcomes associated with exposure. The output of this process is an occupational exposure band (OEB), which corresponds to a range of exposure concentrations that are expected to protect worker health.

#### **MATERIAL DATA**

Airborne particulate or vapour must be kept to levels as low as is practicably achievable given access to modern engineering controls and monitoring hardware. Biologically active compounds may produce idiosyncratic effects which are entirely unpredictable on the basis of literature searches and prior clinical experience (both recent and past).

8.2 Exposure contro	ols
Appropriate	Avoid creating or spreading dust. Ensure adequate ventilation, especially in confined
engineering	areas. Emergency eye wash fountains and safety showers should be available in the
controls	immediate vicinity of any potential exposure. Ensure all national/local regulations are
	observed.
Personal	
protection	
Eye and face	When handling very small quantities of the material eye protection may not be required.
protection	For laboratory, larger scale or bulk handling or where regular exposure in an
	occupational setting occurs: chemical goggles, face shield, full face shield may be
Skin protection	required. Contact lenses may pose a special hazard.  See Hand protection below.
Hands/feet protection	In laboratory, medical or industrial settings, impervious disposable gloves and protective
	clothing are recommended if skin contact with drug product is possible.
Body protection	See Other protection below
Other protection	For quantities up to 500 grams a laboratory coat may be suitable. For quantities up to 1
	kilogram a disposable laboratory coat or coverall of low permeability is recommended.
	Coveralls should be buttoned at collar and cuffs. For quantities over 1 kilogram and
	manufacturing operations, wear disposable coverall of low permeability and disposable
	shoe covers. For manufacturing operations, air-supplied full body suits may be required for the provision of advanced respiratory protection. Eye wash unit. Ensure there is ready
	access to an emergency shower. For Emergencies: Vinyl suit.
Respiratory	When manufacturing or handling product in large quantities and dusts or particulates may
protection	be generated, maintain airborne concentrations below recommended limits. Workplace
protection	risk assessments should be completed before specifying and implementing respirator
	usage. NIOSH/MSHA approved respirators for protection should be used if found to be
	necessary.
	Particulate. (AS/NZS 1716 & 1715, EN 143:2000 & 149:001, ANSI Z88 or national
	equivalent).

SECTION 11: TOXICOLOGICAL INFORMATION					
Inhalation	The material is not thought to produce respiratory irritation (as classified by EC Directives using animal models). Nevertheless inhalation of dusts, or fumes, especially for prolonged periods, may produce respiratory discomfort and occasionally, distress. Inhalation of dusts, generated by the material during the course of normal handling, may be damaging to the health				
Ingestion	of the individual.  Toxic effects may result from the accidental ingestion of the material; animal experiments indicate that ingestion of less than 40 gram may be fatal or may produce serious damage to the health of the individual.				
Skin contact				hygiene sed in an	
Eye contact	· · · · · · · · · · · · · · · · · · ·			njunctival ign body	
Chronic	Chronic Practical experience shows that skin contact with the material is capable either of inducing a sensitisation reaction in a substantial number of individuals. There is some evidence that human exposure to the material may result in developmental toxicity. Long term exposure to high dust concentrations may cause changes in lung function (i.e. pneumoconiosis) caused by particles less than 0.5 micron penetrating and remaining in the lung.			at human nigh dust

## **SECTION 16: OTHER INFORMATION**

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.
