|---|---|
| **Eye contact** | Rinse thoroughly with plenty of water keeping the eyelids open and consult a physician if irritation persist. |
| **Skin contact** | Wash off with soap and plenty of water. Remove contaminated clothing. Consult a physician if irritation persist. |
| **Inhalation** | Take the injured person outdoors and keep them at rest and warm and get medical attention if symptoms persist. |
| **Ingestion** | Do not induce vomiting. Seek medical advice. |

**4.2 Most important symptoms and effects, both acute and delayed**
See Section 11

**4.3 Indication of any immediate medical attention and special treatment needed**
Treat symptomatically

## SECTION 5: FIRE–FIGHTING MEASURES

**5.1 Extinguishing media**
Use alcohol stable foam, dry chemical powder, BCF (where regulations permit) or carbon dioxide and water spray or fog for large fires only

**5.2 Special hazards arising from the substance or mixture**

| | |
|---|---|
| **Fire Incompatibility** | Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, pool chlorine etc. as ignition may result. |

**5.3 Special protective equipment and precautions for fire-fighters**

| | |
|---|---|
| **Fire Fighting** | A fire will often produce a thick black smoke. Exposure to decomposition products may be hazardous to health. Do not breathe in smoke. In the event of a fire, may form carbon monoxide and carbon dioxide. |
| **Fire/Explosion Hazard** | The material is not readily combustible under normal conditions. However, it will break down under fire conditions and the organic component may burn. Not considered to be a significant fire risk. Heat may cause expansion or decomposition with violent rupture of containers. Decomposes on heating and may emit toxic fumes. |

## SECTION 6: ACCIDENTAL RELEASE MEASURES

**6.1 Personal precautions, protective equipment and emergency procedures**
See Section 8

**6.2 Environmental precautions**
Contain and control the leaks or spills with non-combustible absorbent materials such as sand, earth, vermiculite, diatomaceous earth in drums for waste disposal. Prevent any material from entering drains or waterways. Also see Section 12

**6.3 Methods and material for containment and cleaning up**

| | |
|---|---|
| **Minor spills** | Clean up all spills immediately. Avoid breathing vapours and contact with skin and eyes. Shut off all possible sources of ignition and increase ventilation. Wipe up. Place in a suitable, labelled container for waste disposal. |
| **Major spills** | Clear area of personnel and move upwind. Alert Fire Brigade about the hazard. May be violently or explosively reactive. Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or water course. No smoking, naked lights or ignition sources. Stop leak if safe to do so. Absorb or cover spill with sand, earth, inert materials or vermiculite. Collect recoverable product into labelled containers for disposal. |

Personal Protective Equipment advice is contained in Section 8 of the SDS.

## SECTION 7: HANDLING AND STORAGE

**7.1 Precautions for safe handling**

| | |
|---|---|
| **Safe handling** | Limit all unnecessary personal contact. Wear protective clothing when risk of exposure occurs. Use in a well-ventilated area. When handling **DO NOT** eat, drink or smoke. Always wash hands with soap and water after handling. Avoid physical damage to containers. Use good occupational work practice. Observe manufacturer's storage and handling recommendations contained within this SDS. |
| **Other information** | Store in original containers. Keep containers securely sealed. Store in a cool, dry, well-ventilated area. Store away from incompatible materials and foodstuff containers. Protect containers against physical damage and check regularly for leaks. Observe manufacturer's storage and handling recommendations contained within this SDS. |

**7.2 Conditions for safe storage, including any incompatibilities**

| | |
|---|---|
| **Suitable container** | Polyethylene or polypropylene container. Packing as recommended by manufacturer. Check all containers are clearly labelled and free from leaks. |

**11.1 Information on toxicological effects**

| | |
|---|---|
| **Inhaled** | The material is not thought to produce respiratory irritation (as classified by EC Directives using animal models). Nevertheless inhalation of vapours, fumes or aerosols, especially for prolonged periods, may produce respiratory discomfort and occasionally, distress. |
| **Ingestion** | Accidental ingestion of the material may be damaging to the health of the individual. |
| **Skin Contact** | Open cuts, abraded or irritated skin should not be exposed to this material. Entry into the blood-stream through, for example, cuts, abrasions, puncture wounds or lesions, may produce systemic injury with harmful effects. Examine the skin prior to the use of the material and ensure that any external damage is suitably protected. Not considered to cause discomfort through normal use. |

| | |
|---|---|
| **Eye** | Limited evidence exists, or practical experience suggests, that the material may cause eye irritation in a substantial number of individuals and/or is expected to produce significant ocular lesions which are present 24 hours or more after instillation into the eye(s) of experimental animals. |
| **Chronic** | No adverse effects anticipated from normal use. Limited evidence suggests that repeated or long-term occupational exposure may produce cumulative health effects involving organs or biochemical systems. |

## SECTION 16: OTHER INFORMATION

Classification of the preparation and its individual components has drawn on an independent review by the Chemwatch Classification committee using available literature references.

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.
