## **SAFETY DATA SHEETS**

# This SDS packet was issued with item:

078947208

The safety data sheets (SDS) in this packet apply to the individual products listed below. Please refer to invoice for specific item number(s).

078947209

Product Name: Malaseb Shampoo

Date: 07/2022 Version No: 2022-1 Page 1 of 9

SECTION 1: IDENTIFICATION	
1.1 Product identifier	
Product name	Malaseb Shampoo
Chemical name	Not Applicable
Synonyms	Not Available
Chemical formula	Not Available
Other means ofidentification	
1.2 Relevant identified uses of the	e substances or mixture and uses advised against
Recommended uses	Product care for animals.
	Dogs: For the treatment and control of seborrhoeic dermatitis associated
	with Malassezia pachydermatis and Staphylococcus intermedius.
	Cats: As an aid in the treatment of ringworm due to Microsporum canis in
	conjunction with griseofulvin.
	This SDS is written to address potential worker health and safety issues
	associated with the handling of the mixture
1.3 Details of the supplier of the s	substance or mixture
Registered company name (US)	Dechra Veterinary Products
Address	7015 College Blvd Suite 525
	Overland Park
	KS 66211 USA
Telephone	866-933-2472
	Not Available
	Not Available
1.4 Emergency telephone number	rs
Dechra (US)	866-933-2472

## **SECTION 2: HAZARDS IDENTIFICATION**

## 2.1 Classification of the substance or mixture

Safety Data Sheet according to OSHA HazCom Standard (2012) requirements (GHS.USA)

## NFPA 704 diamond

Note: The hazard category numbers found in GHS classification insection 2 of this SDSs are NOT to be used to fill in the NFPA 704 diamond. Blue = Health Red = Fire Yellow = Reactivity White = Special (Oxidizer or water reactive substances)

## Classification

Skin Corrosion/Irritation Category 2, Sensitisation (Skin) Category 1, Serious Eye Damage/Eye Irritation Category 1, Reproductive Toxicity Category 2, Hazardous to the Aquatic Environment Long-Term Hazard Category 3

#### 2.2 Label elements

Hazard pictogram(s)

Signal	word	Danger

## Hazard statement(s)

H315	Causes	skin	irritation
------	--------	------	------------

H317 May cause an allergic skin reaction.

H318 Causes serious eye damage.

H361 Suspected of damaging fertility or the unborn child.

H412 Harmful to aquatic life with long lasting effects.

#### Hazard(s) not otherwise classified

Not Applicable

## Precautionary statement(s) prevention

P201	Obtain special instructions before use.
P280	Wear protective gloves, protective clothing, eye protection and face protection.
P261	Avoid breathing mist/vapours/spray.
P273	Avoid release to the environment.

**P202** Do not handle until all safety precautions have been read and understood.

Product Name: Malaseb Shampoo

Date: 07/2022 Version No: 2022-1 Page 2 of 9

P264	Wash all exposed external body areas thoroughly after handling.			
P272	Contaminated work clothing must not be allowed out of the workplace.			
Precautionary sta	tement(s) response			
P305+P351+P338	338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if			
	present and easy to do. Continue rinsing.			
P308+P313	IF exposed or concerned: Get medical advice/ attention.			
P310	Immediately call a POISON CENTER/doctor/physician/first aider.			
P333+P313	If skin irritation or rash occurs: Get medical advice/attention.			
P302+P352	IF ON SKIN: Wash with plenty of water.			
P332+P313	f skin irritation occurs: Get medical advice/attention.			
P362+P364	Take off contaminated clothing and wash it before reuse.			
Precautionary sta	tement(s) storage			
P405	Store locked up.			
Precautionary statement(s) disposal				
P501	Dispose of contents/container to authorised hazardous or special waste collection point in			
	accordance with any local regulation.			

SECTION 3: INFORMATION ON THE INGREDIENTS				
3.1 Substances	ve for composition of Mixtu	rae		
3.2 Mixtures	ve for composition or white	165.		
CAS No.	% [weight]	Name		
110615-47-9	10-30	decyl polyglucoside		
68551-12-2	1-10	laureth-12		
112-02-7	1-10	cetrimonium chloride		
18472-51-0	1-5	chlorhexidine gluconate		
22832-87-7	1-5	miconazole nitrate		
Not Available balance Ingredients determined not to be hazardous				
The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.				

SECTION 4: FIRST AID MEASURES						
4.1 Description	4.1 Description of first aid measures					
Eye contact	Immediately hold eyelids apart and flush the eye continuously with running water. Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids. Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes. Transport to hospital or doctor without delay.					
Skin contact	Immediately remove all contaminated clothing, including footwear. Flush skin and hair with running water (and soap if available). Seek medical attention in event of irritation.					
Inhalation	If fumes, aerosols or combustion products are inhaled remove from contaminated area. Other measures are usually unnecessary.					
Ingestion If swallowed do NOT induce vomiting. If vomiting occurs, maintain open airway and prevent aspiration. Observe the patient carefully. Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious. Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink. Seek medical advice.  4.2 Most important symptoms and effects, both acute and delayed						

## est important symptoms and effects, both acute and delayed

See section 11

## 4.3 Indication of immediate medical attention and special treatment needed

Treat symptomatically.

Suggested treatment regime for biguanide intoxication:

Establish airway and assist ventilation with positive end expiratory pressure, if required, after endotracheal intubation. Circulatory competence must be maintained - monitor blood pressure carefully.

Induction of emesis with Ipecac may be contraindicated as a result of biguanide-induced gastric mucosal irritation.

Gastric lavage, following endotracheal intubation may be preferred. Activated charcoal and cathartics placed through the lavage tube may be useful. Forcing fluids may be counterproductive and result in fluid overload.

Haemodialysis may be useful as, in addition to facilitating the removal of biguanide and excess lactate, it permits the administration of adequate amounts of sodium bicarbonate without the risk of fluid overload or hypernatraemia.

Hypoglycaemia can be treated immediately with 50 mL of 50% glucose intravenously in adults or 0.5 g/kg per dose in children.

cidosis may be treated with IV sodium bicarbonate (1-2 mEq/kg); doses of 44-50 mEq every 15 minutes may be required. Ensure that

Product Name: Malaseb Shampoo

Date: 07/2022 Version No: 2022-1 Page 3 of 9

arterial blood gases, serum sodium chloride, potassium and ECG are monitored. The patient may require 200-400 mEq of sodium bicarbonate.

Dehydration and hypovolaemia may require placement of a central venous line.

Hypotension may be treated by placing the patient in Trendelenburg's position and the cautious use of IV fluids. Pressor amines should be used cautiously, with blood lactate monitoring, as they may increase lactic acid production.

ELLENHORN and BARCELOUX: Medical Toxicology; Diagnosis and Treatment of Human Poisoning. 1988

#### **SECTION 5: FIRE FIGHTING MEASURES**

#### 5.1 Extinguishing media

The product contains a substantial proportion of water, therefore there are no restrictions on the type of extinguishing media which may be used. Choice of extinguishing media should take into account surrounding areas.

Though the material is non-combustible, evaporation of water from the mixture, caused by the heat of nearby fire, may produce floating layers of combustible substances Use foam, dry chemical powder, BCF (where regulations permit), carbon dioxide or water spray or fog – large fires only.

5 2	Special	hazards	arising	from the	substance	or mixture
J.Z	SUCCIAI	iiazai uə	ansmu	HOIH HIE	SUDSLAILLE	OI IIIIALUIE

**Fire incompatibility** Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, pool chlorine etc. as ignition may result

## 5.3 Special protective actions for fire-fighters:

#### Firefighting

Wear full body protective clothing with breathing apparatus. Prevent, by any means available, spillage from entering drains or water course. Use firefighting procedures suitable for surrounding area. Avoid spraying water onto liquid pools. DO NOT approach containers suspected to be hot. Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire.

# Fire / explosion hazard

The emulsion is not combustible under normal conditions. However, it will break down under fire conditions and the hydrocarbon component will burn. Heating may cause expansion or decomposition leading to violent rupture of containers and toxic fume production carbon dioxide, nitrogen oxides and other pyrolysis products typical of burning organic material. May emit poisonous/corrosive fumes.

## **SECTION 6: ACCIDENTAL RELEASE MEASURES**

#### 6.1 Personal precautions, protective equipment and emergency procedures

See Section 8

## 6.2 Environmental precautions

See Section 12

#### 6.3 Methods and material for containment and cleaning up

#### Minor spills

Clean up all spills immediately. Avoid breathing vapours and contact with skin and eyes. Control personal contact with the substance, by using protective equipment. Contain and absorb spill with sand, earth, inert material or vermiculite. Wipe up. Place in a suitable, labelled container for waste disposal. Slippery when spilt.

#### Major spills

Clear area of personnel and move upwind. Alert Fire Brigade and tell them location and nature of hazard. Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or water course. No smoking, naked lights or ignition sources. Increase ventilation. Stop leak if safe to do so. Contain spill with sand, earth or vermiculite. Collect recoverable product into labelled containers for recycling. Absorb remaining product with sand, earth or vermiculite. Collect solid residues and seal in labelled drums for disposal. Wash area and prevent runoff into drains. If contamination of drains or waterways occurs, advise emergency services.

Personal Protective Equipment advice is contained in Section 8 of the SDS.

## **SECTION 7: HANDLING AND STORAGE**

#### 7.1 Precautions for safe handling

## Safe handling

Avoid all personal contact, including inhalation. Wear protective clothing when risk of exposure occurs. Use in a well-ventilated area. **DO NOT** enter confined spaces until atmosphere has been checked. **DO NOT** allow clothing wet with material to stay in contact with skin Avoid contact with incompatible materials. When handling, **DO NOT** eat, drink or smoke. Keep containers securely sealed when not in use. Avoid

Product Name: Malaseb Shampoo

Date: 07/2022 Version No: 2022-1 Page 4 of 9

Other information	of children. Store in original containers. Keep containers securely sealed. Store away from incompatible materials and foodstuff containers. Protect containers against			
7.0.0	physical damage and check regularly for leaks.			
	e storage, including any incompatibilities			
Suitable container	Polyethylene or polypropylene container. Packaging as recommended by			
	manufacturer. Check all containers are clearly labelled and free from leaks.			
Storage incompatibility	Avoid reaction with oxidising agents.			

Storage incompatibility Avoid reaction with oxidising agents.

cetrimonium chloride	Е			≤ 0.01 mg/m³			
chlorhexidine gluconate E ≤ 0.1 ppm							
Notes: Occupational exposure	banding is	ар	rocess of assigning chemicals i			or bands b	ased on a
chemical's potency and the adverse health outcomes associated with exposure. The output of this process is an							
occupational exposure band (OEB), which corresponds to a range of exposure concentrations that are expected to							
protect worker health.							
MATERIAL DATA							
8.2 Exposure controls						•	

## 8.2 Exposure controls

Appropriate engineering controls

The basic types of engineering controls are process controls which involve changing the way a job activity or process is done to reduce the particular risk.

Product Name: Malaseb Shampoo Date: 07/2022

Date: 07/2022 Version No: 2022-1 Page 5 of 9

Eye and face	When handling very small quantities of the material eye protection may not be			
protection	required. For laboratory, larger scale or bulk handling or where regular exposure in an			
	occupational setting occurs use Safety glasses with side shields or chemical goggles.			
Skin protection	See Hand protection below.			
Hands/feet protection	No special equipment needed when handling small quantities. OTHERWISE: Wear			
	chemical protective gloves, safety footwear or safety gumboots, e.g. Rubber			
Body protection	See Other protection below			
Other protection	Overalls, P.V.C apron, barrier cream, skin cleansing cream, eye wash unit.			
Respiratory protection	Type A-P Filter of sufficient capacity. (AS/NZS 1716 & 1715, EN 143:2000 &			
	149:2001, ANSI Z88 or national equivalent)			

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES						
9.1 Information on basic physical and chemical properties						
Appearance: Clear, colorless to light brown liquid	Vapor density: NA					
Physical state: Liquid	Auto ignition temperature (degrees C): NA					
Odor: Characteristic	Decomposition temperature (degrees C): NA					
Odor threshold: NA	Viscosity (degrees C): NA					
pH (as supplied): 4.8-5.8	Explosive properties: NA					
Melting point / freezing point (degrees C): NA	Oxidizing properties: NA					
Initial boiling point and boiling range: NA	Partition coefficient: NA					
Flash point: NA	Molecular weight: NA					
Evaporation rate: NA	Taste: NA					
Flammability: Flammable	Surface tension: NA					
Upper/lower flammability or explosive limits: NA	Volatile component (%vol): NA					
Vapor pressure: NA	Gas group: NA					
Relative density (at degrees C): NA	pH as a solution: NA					
Solubility in water (mg/l): Miscible	VOC g/L: NA					
	Specific gravity @ 20 degrees C (water = 1): NA					

10: STABILITY AND REACTIVITY				
Reactivity	See Section 7			
Chemical stability	Product is considered stable. Hazardous polymerization will not occur.			
-	Unstable in the presence of incompatible materials			
Possibility of hazardous reactions	See Section 7			
Conditions to avoid	See Section 7			
Incompatible materials	See Section 7			
Hazardous composition	See Section 5			

SECTION 11:	TOXICOLOGICAL INFORMATION				
Inhalation	The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified by EC Directives using animal models). Nevertheless, good hygiene practice				
	requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.				
Ingestion	Accidental ingestion of the material may be da	amaging to the health of the individual.			
Skin contact	Skin contact is not thought to have harmful hea	alth effects (as classified under EC Directives); the			
	material may still produce health damage following entry through wounds, lesions or abrasions.				
Eye contact	When applied to the eye(s) of animals, the material produces severe ocular lesions which are				
	present twenty-four hours or more after instillation.				
Chronic					
	sensitisation reaction in a substantial number of individuals.

#### **SECTION 13: DISPOSAL CONSIDERATIONS**

#### 13.1 Waste treatment methods

Product/ packaging disposal

DO NOT allow wash water from cleaning or process equipment to enter drains. It may be necessary to collect all wash water for treatment before disposal. Recycle wherever possible. Decontaminate empty containers. Observe all label safeguards until containers are cleaned and destroyed. Any unused veterinary medicinal product or waste material derived from such veterinary medicinal products should be disposed of in accordance with national requirements.

#### **SECTION 16: OTHER INFORMATION**

Revision date: 6 July 2022 Initial date: 6 July 2022

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.
