

SAFETY DATA SHEETS

This SDS packet was issued with item:

078950117

The safety data sheets (SDS) in this packet apply to the individual products listed below. Please refer to invoice for specific item number(s).

078928778 078936858 078937198 078937224 078938015 078944764 078944769 078944797 078945422 078945455

078945456 078945457 078950401

SECTION 1: Identification

1.1 Product identifier

Product name	Clavacillin (amoxicillin and clavulanate potassium for oral suspension), USP Drops
Chemical name	Not Applicable
Synonyms	Not Available
Chemical formula	Not Applicable
Other means of identification	Not Available

1.2 Recommended use of the chemical and restrictions on use

Relevant identified uses	Oral antibiotic drops for dogs and cats. Not for human use.
---------------------------------	---

1.3 Name, address, and telephone number of the chemical manufacturer, importer, or other responsible party

Registered company name (US)	Dechra Veterinary Products
Address	7015 College Blvd Suite 525, Overland Park, KS 66211 USA
Telephone	866-933-2472
Fax	Not Available
Email	Not Available

1.4 Emergency telephone numbers

Dechra (US)	866-933-2472
--------------------	--------------

SECTION 2: Hazard(s) identification

2.1 Classification of the substance or mixture

NFPA 704 diamond

Note: The hazard category numbers found in GHS classification in section 2 of this SDSs are NOT to be used to fill in the NFPA 704 diamond. Blue = Health Red = Fire Yellow = Reactivity White = Special (Oxidizer or water reactive substances)

Classification	Skin Corrosion/Irritation Category 2, Sensitisation (Skin) Category 1, Serious Eye Damage/Eye Irritation Category 2A, Sensitisation (Respiratory) Category 1, Specific Target Organ Toxicity - Single Exposure (Respiratory Tract Irritation) Category 3, Specific Target Organ Toxicity - Repeated Exposure Category 2, Hazardous to the Aquatic Environment Long-Term Hazard Category 3
-----------------------	---

2.2 Label elements

Hazard pictogram(s)	
----------------------------	---

Signal word	Danger
--------------------	---------------

Hazard statement(s)

H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H319	Causes serious eye irritation.
H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335	May cause respiratory irritation.
H373	May cause damage to organs through prolonged or repeated exposure.
H412	Harmful to aquatic life with long lasting effects.

Hazard(s) not otherwise classified

Not Applicable

Precautionary statement(s) Prevention

P260	Do not breathe dust/fume.
P261	Avoid breathing dust/fumes.
P271	Use only outdoors or in a well-ventilated area.
P284	[In case of inadequate ventilation] wear respiratory protection.
P273	Avoid release to the environment.
P280	Wear protective gloves, protective clothing, eye protection and face protection.
P264	Wash all exposed external body areas thoroughly after handling.
P272	Contaminated work clothing must not be allowed out of the workplace.

Precautionary statement(s) Response

P304+P340	IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P342+P311	If experiencing respiratory symptoms: Call a POISON CENTER/doctor/physician/first aider.
P305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P312	Call a POISON CENTER/doctor/physician/first aider/if you feel unwell.
P314	Get medical advice/attention if you feel unwell.
P333+P313	If skin irritation or rash occurs: Get medical advice/attention.
P337+P313	If eye irritation persists: Get medical advice/attention.
P302+P352	IF ON SKIN: Wash with plenty of water.
P332+P313	If skin irritation occurs: Get medical advice/attention.
P362+P364	Take off contaminated clothing and wash it before reuse.

Precautionary statement(s) storage

P405	Store locked up.
P403+P233	Store in a well-ventilated place. Keep container tightly closed.

Precautionary statement(s) disposal

P501	Dispose of contents/container to authorised hazardous or special waste collection point in accordance with any local regulation.
-------------	--

SECTION 3: Composition / information on ingredients

3.1 Substances

See section below for composition of Mixtures.

3.2 Mixtures

CAS No.	% [weight]	Name
61336-70-7	30-40	<u>amoxicillin trihydrate</u>
61177-45-5	10-15	<u>clavulanate potassium</u>
proprietary	proprietary	<u>cellulose</u>
proprietary	proprietary	<u>silicon dioxide (silica precipitated)</u>
proprietary	proprietary	<u>sodium saccharin</u>

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

SECTION 4: First-aid measures

4.1 Description of first aid measures

Eye contact	If this product comes in contact with the eyes, wash out immediately with fresh running water. Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids. Seek medical attention without delay; if pain persists or recurs seek medical attention. Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.
Skin contact	If skin contact occurs, immediately remove all contaminated clothing, including footwear. Flush skin and hair with running water (and soap if available). Seek medical attention in event of irritation.
Inhalation	If fumes, aerosols or combustion products are inhaled remove from contaminated area. Lay patient down. Keep warm and rested. Prostheses such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures. Apply artificial respiration if not breathing, preferably with a demand valve resuscitator, bag-valve mask device, or pocket mask as trained. Perform CPR if necessary. Transport to hospital, or doctor.
Ingestion	If swallowed do NOT induce vomiting. If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration. Observe the patient carefully. Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious. Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink. Seek medical advice.

4.2 Most important symptoms and effects, both acute and delayed

See section 11.

4.3 Indication of immediate medical attention and special treatment needed

When cutaneous reactions to penicillin occur, they may subside spontaneously within a few hours or days following withdrawal of the antibiotic. Administration of antihistamines, or in the absence of a response, corticosteroids, may control reactions.

Treatment of penicillin overdose may include: Perform gastric decontamination in cases of severe ingestion. Administer activated charcoal as a slurry. Manage anaphylaxis with establishment of patent airway, epinephrine, and diphenhydramine. For seizures, administer intravenous diazepam or lorazepam. If seizures recur, consider phenobarbital. [Meditext 2007 and PDR 2007]

Treat symptomatically.

SECTION 5: Fire-fighting measures

5.1 Extinguishing media

There is no restriction on the type of extinguisher which may be used. Use extinguishing media suitable for surrounding area.

5.2 Special hazards arising from the substance or mixture

Fire incompatibility	Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, pool chlorine etc. as ignition may result.
-----------------------------	---

5.3 Special protective actions for fire-fighters:

Firefighting	Alert Fire Brigade and tell them location and nature of hazard. Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or water course. Use water delivered as a fine spray to control fire and cool adjacent area. Use firefighting procedures suitable for surrounding area. DO NOT approach containers suspected to be hot. Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire. Equipment should be thoroughly decontaminated after use.
Fire / explosion hazard	Combustible solid which burns but propagates flame with difficulty. Avoid generating dust, particularly clouds of dust in a confined or unventilated space as dusts may form an explosive mixture with air, and any source of ignition, i.e. flame or spark, will cause fire or explosion. Build-up of electrostatic charge may be prevented by bonding and grounding. Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting. Combustion products include carbon monoxide, carbon dioxide, nitrogen/sulfur/silicon oxides, other pyrolysis products typical of burning organic material. May emit clouds of poisonous/corrosive fumes.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

See section 8.

6.2 Environmental precautions

See Section 12.

6.3 Methods and material for containment and cleaning up

Minor spills	Clean up waste regularly and abnormal spills immediately. Avoid breathing dust and contact with skin and eyes. Wear protective clothing, gloves, safety glasses and dust respirator. Use dry clean up procedures and avoid generating dust. Vacuum up or sweep up. NOTE: Vacuum cleaner must be fitted with an exhaust micro filter (H-Class HEPA type) (consider explosion-proof machines designed to be grounded during storage and use). H-Class HEPA filtered industrial vacuum cleaners should NOT be used on wet materials or surfaces. Dampen with water to prevent dusting before sweeping. Place in suitable containers for disposal.
Major spills	Minor hazard. Clear area of personnel. Alert Fire Brigade and tell them location and nature of hazard. Control personal contact with the substance, by using protective equipment as required. Prevent spillage from entering drains or water ways. Contain spill with sand, earth or vermiculite. Collect recoverable product into labelled containers for recycling. Absorb remaining product with sand, earth or vermiculite and place in appropriate containers for disposal. Wash area and prevent runoff into drains or waterways. If contamination of drains or waterways occurs, advise emergency services.

Personal Protective Equipment advice is contained in Section 8 of the SDS.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Safe handling	Avoid all personal contact, including inhalation. Wear protective clothing when risk of exposure occurs. Use in a well-ventilated area. Prevent concentration in hollows and sumps. DO NOT enter confined spaces until atmosphere has been checked. DO NOT allow material to contact humans, exposed food or food utensils. Avoid contact with incompatible materials. When handling, DO NOT eat, drink or smoke. Keep containers securely sealed when not in use. Avoid physical damage to containers. Always wash hands with soap and water after handling. Work clothes should be laundered separately. Launder contaminated clothing before re-use. Use good occupational work practice. Observe manufacturer's storage and handling recommendations contained within this SDS. Empty containers may contain residual dust which has the potential to accumulate following settling. Such dusts may explode in the presence of an appropriate ignition source. Do NOT cut, drill, grind or weld such containers. In addition ensure such activity is not performed near full, partially empty or empty containers without appropriate workplace safety authorisation or permit.
Other information	Store in original containers. Keep containers securely sealed. Store in a cool, dry area protected from environmental extremes. Store away from incompatible materials and foodstuff containers. Protect containers against physical damage and check regularly for leaks. For major quantities: Consider storage in banded areas - ensure storage areas are isolated from sources of community water. Ensure that accidental discharge to air or water is the subject of a contingency disaster management plan; this may require consultation with local authorities.

7.2 Conditions for safe storage, including any incompatibilities

Suitable container	Glass container is suitable for laboratory quantities. Polyethylene or polypropylene container. Check all containers are clearly labelled and free from leaks.
Storage incompatibility	Avoid strong acids, bases. Avoid reaction with oxidising agents

SECTION 8: Exposure controls / personal protection

8.1 Control parameters

Occupational exposure limits (OEL)

Source	Ingredient	Material name	TWA	STEL	Peak	Notes
US OSHA Permissible Exposure Limits (PELs) Table Z-1	cellulose	Cellulose- Total dust	15 mg/m ³	Not Available	Not Available	Not Available
US OSHA PELs Table Z-1	cellulose	Cellulose- Respirable fraction	5 mg/m ³	Not Available	Not Available	Not Available
US OSHA PELs Table Z-3	cellulose	Inert or Nuisance Dust: Respirable fraction	5 mg/m ³ / 15 mppcf	Not Available	Not Available	Not Available
US OSHA PELs Table Z-3	cellulose	Inert or Nuisance Dust: Total Dust	15 mg/m ³ / 50 mppcf	Not Available	Not Available	Not Available
US NIOSH Recommended Exposure Limits (RELs)	cellulose	Cellulose - total	10 mg/m ³	Not Available	Not Available	Not Available
US NIOSH RELs	cellulose	Cellulose - respirable	5 mg/m ³	Not Available	Not Available	Not Available

US OSHA PELs Table Z-1	silicon dioxide (silica precipitated)	PNOR- Respirable fraction	5 mg/m ³	Not Available	Not Available	Not Available
US OSHA PELs Table Z-3	silicon dioxide (silica precipitated)	Inert or Nuisance Dust: Respirable fraction	5 mg/m ³ / 15 mppcf	Not Available	Not Available	Not Available

US OSHA PELs Table Z-3	silicon dioxide (silica precipitated)	Inert or Nuisance Dust: Total Dust	5 mg/m ³ / 15 mppcf	Not Available	Not Available	Not Available
US NIOSH RELs	silicon dioxide (silica precipitated)	PNOR	Not Available	Not Available	Not Available	Not Available
Emergency limits						
Ingredient		TEEL-1	TEEL-2	TEEL-3		
silicon dioxide (silica precipitated)		18 mg/m ³	200 mg/m ³	1,200 mg/m ³		
Ingredient		Original IDLH		Revised IDLH		
Not Available for any ingredient		Not Available for any ingredient		Not Available for any ingredient		
Occupational Exposure Banding						
Ingredient		Occupational Exposure Band Rating		Occupational Exposure Band Limit		
amoxicillin trihydrate		E		≤ 0.01 mg/m ³		
clavulanate potassium		E		≤ 0.01 mg/m ³		
Notes: Occupational exposure banding is a process of assigning chemicals into specific categories or bands based on a chemical's potency and the adverse health outcomes associated with exposure. The output of this process is an occupational exposure band (OEB), which corresponds to a range of exposure concentrations that are expected to protect worker health.						
MATERIAL DATA						
8.2 Exposure controls						
Appropriate engineering controls		Enclosed local exhaust ventilation is required at points of dust, fume or vapour generation. HEPA terminated local exhaust ventilation should be considered at point of generation of dust, fumes or vapours. Barrier protection or laminar flow cabinets should be considered for laboratory scale handling. A fume hood or vented balance enclosure is recommended for weighing/transferring quantities exceeding 500 mg. When handling quantities up to 500 g in either a standard laboratory with general dilution ventilation (e.g. 6-12 air changes per hour) is preferred. Quantities up to 1 kg may require a designated laboratory using fume hood, biological safety cabinet, or approved vented enclosures. Quantities exceeding 1 kg should be handled in a designated laboratory or containment laboratory using appropriate barrier/ containment technology.				
Personal protection						
Eye and face protection		When handling very small quantities of the material eye protection may not be required. For laboratory, larger scale or bulk handling or where regular exposure in an occupational setting occurs: Use chemical goggles [AS/NZS 1337.1, EN166 or national equivalent]. Face shield. Full face shield may be required for supplementary but never for primary protection of eyes. Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants.				
Skin protection		See Hand/feet protection below.				
Hands/feet protection		The material may produce skin sensitisation in predisposed individuals. Care must be taken, when removing gloves and other protective equipment, to avoid all possible skin contact. Contaminated leather items, such as shoes, belts and watch-bands should be removed and destroyed. The selection of suitable gloves does not only depend on the material, but also on further marks of quality which vary from manufacturer to manufacturer. Select gloves tested to a relevant standard (e.g. Europe EN 374, US F739, AS/NZS 2161.1 or national equivalent).				
Body protection		See Other protection below.				
Other protection		For quantities up to 500 g a laboratory coat may be suitable. For quantities up to 1 kg a disposable laboratory coat or coverall of low permeability is recommended. Coveralls should be buttoned at collar and cuffs. For quantities over 1 kg and manufacturing operations, wear disposable coverall of low permeability and disposable shoe covers. For manufacturing operations, air-supplied full body suits may be required for the provision of advanced respiratory protection. Eye wash unit. Ensure there is ready access to an emergency shower. For Emergencies: Vinyl suit				
Respiratory protection		Type -P Filter of sufficient capacity. (AS/NZS 1716 & 1715, EN 143:2000 & 149:2001, ANSI Z88 or national equivalent)				

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance: White to light yellow powder with some yellow grains. Forms a white to light yellow suspension in water Physical state: Solid Odor: Not Available Odor threshold: Not Available pH (as supplied): Not Available Melting point / freezing point (°C): Not Available Initial boiling point and boiling range (°C): Not Available Flash point (°C): Not Available Evaporation rate: Not Available Flammability: Not Available Upper/lower flammability or explosive limits: Not Available Vapor pressure: Not Available Relative density (Water = 1): Not Available Solubility in water (mg/l): Partly miscible	Vapor density: Not Available Auto ignition temperature (°C): Not Available Decomposition temperature (°C): Not Available Viscosity (°C): Not Available Explosive properties: Not Available Oxidizing properties: Not Available Partition coefficient: Not Available Molecular weight: Not Available Taste: Not Available Surface tension: Not Available Volatile component (%vol): Not Available Gas group: Not Available pH as a solution: Not Available VOC g/L: Not Available Specific gravity @ 20°C (water = 1): Not Available
---	---

SECTION 10: Stability and reactivity	
Reactivity	See Section 7
Chemical stability	Product is considered stable. Hazardous polymerization will not occur. Unstable in the presence of incompatible materials.
Possibility of hazardous reactions	See Section 7
Conditions to avoid	See Section 7
Incompatible materials	See Section 7
Hazardous composition	See Section 5

SECTION 11: Toxicological information			
Information on toxicological effects			
Inhalation	May produces irritation of the respiratory system, in a substantial number of individuals, following inhalation.		
Ingestion	In the case of accidental oral intake, seek medical advice immediately and show the package leaflet. Ingestion may cause nausea, vomiting abdominal irritation, and pain.		
Skin contact	The material may produce mild inflammation of the skin in a substantial number of individuals following direct contact.		
Eye contact	Repeated or prolonged eye contact may cause inflammation characterised by temporary redness (similar to windburn) of the conjunctiva (conjunctivitis); temporary impairment of vision and/or other transient eye damage/ulceration may occur.		
Chronic	Long-term exposure to respiratory irritants may result in disease of the airways involving difficult breathing and related systemic problems. Practical evidence shows that inhalation of the material is capable of inducing a sensitisation reaction in a substantial number of individuals at a greater frequency than would be expected from the response of a normal population. Activities giving rise to short-term peak concentrations should receive particular attention when risk management is being considered. Health surveillance is appropriate for all employees exposed or liable to be exposed to a substance which may cause occupational asthma and there should be appropriate consultation with an occupational health professional over the degree of risk and level of surveillance.		
Clavacillin (amoxicillin and clavulanate potassium for oral suspension), USP Drops	Toxicity	Irritation	
	Not Available	Not Available	
amoxicillin trihydrate	Toxicity	Irritation	
	dermal (rat) LD ₅₀ : >2000 mg/kg ^[1] Oral (rat) LD ₅₀ : >2000 mg/kg ^[1]	Not Available

International WHO List of Proposed Occupational Exposure Limit (OEL) Values for Manufactured Nanomaterials (MNMS), US - Alaska Air Quality Control - Concentrations Triggering an Air Quality Episode for Air Pollutants Other Than PM-2.5, US - Massachusetts - Right To Know Listed Chemicals, US NIOSH Recommended Exposure Limits (RELs), US OSHA Permissible Exposure Limits (PELs) Table Z-1, US OSHA PELs Table Z-3, US TSCA - Chemical Substance Inventory

Silicon dioxide (silica precipitated) is found on the following regulatory lists

International WHO List of Proposed OEL Values for MNMS, US - Alaska Air Quality Control - Concentrations Triggering an Air Quality Episode for Air Pollutants Other Than PM-2.5, US - Massachusetts - Right To Know Listed Chemicals, US DOE Temporary Emergency Exposure Limits (TEELs), US NIOSH RELs, US OSHA PELs Table Z-1, US OSHA PELs Table Z-3

Sodium saccharin is found on the following regulatory lists

International Agency for Research on Cancer (IARC) - Agents Classified by the IARC Monographs - Not Classified as Carcinogenic, US - Massachusetts - Right To Know Listed Chemicals, US TSCA - Chemical Substance Inventory

Federal Regulations

Superfund Amendments and Reauthorization Act of 1986 (SARA)

Section 311/312 hazard categories

Flammable (Gases, Aerosols, Liquids, or Solids)	No
Gas under pressure	No
Explosive	No
Self-heating	No
Pyrophoric (Liquid or Solid)	No
Pyrophoric Gas	No
Corrosive to metal	No
Oxidizer (Liquid, Solid or Gas)	No
Organic Peroxide	No
Self-reactive	No
In contact with water emits flammable gas	No
Combustible Dust	No
Carcinogenicity	No
Acute toxicity (any route of exposure)	No
Reproductive toxicity	No
Skin Corrosion or Irritation	Yes
Respiratory or Skin Sensitization	Yes
Serious eye damage or eye irritation	Yes
Specific target organ toxicity (single or repeated exposure)	Yes
Aspiration Hazard	No
Germ cell mutagenicity	No
Simple Asphyxiant	No
Hazards Not Otherwise Classified	No

US. EPA CERCLA Hazardous Substances and Reportable Quantities (40 CFR 302.4)
None Reported

State Regulations

US. California Proposition 65
Not Reported

National Inventory Status

Australia - AIC / Australia Non-Industrial Use	No (clavulanate potassium)
Canada - DSL	No (clavulanate potassium)
Canada - NDSL	No (amoxicillin trihydrate; clavulanate potassium; silicon dioxide (silica precipitated); sodium saccharin)
China - IECSC	No (amoxicillin trihydrate; clavulanate potassium)
Europe - EINEC / ELINCS / NLP	No (silicon dioxide (silica precipitated))
Japan - ENCS	No (amoxicillin trihydrate; clavulanate potassium; sodium saccharin)
Korea - KECI	No (clavulanate potassium)
New Zealand - NZIoC	Yes
Philippines - PICCS	No (clavulanate potassium)
USA - TSCA	No (amoxicillin trihydrate; clavulanate potassium; silicon dioxide (silica precipitated))
Taiwan - TCSI	Yes
Mexico - INSQ	No (clavulanate potassium)
Vietnam - NCI	Yes
Russia - FBEPH	No (amoxicillin trihydrate; clavulanate potassium)

Yes = All CAS declared ingredients are on the inventory

No = One or more of the CAS listed ingredients are not on the inventory. These ingredients may be exempt or will require registration

SECTION 16: Other information
