Section 5 –Fire-fighting Measures

- (a) **Extinguishing Media** Use extinguishing media appropriate for primary cause of fire (water, carbon dioxide or dry chemical). Use water spray to cool fire exposed containers. Wear self-containing breathing apparatus and protective clothing.
- (b) **Hazardous Combustion Products:** Emits toxic fumes of carbon monoxide, carbon dioxide, oxides of nitrogen, sulfur oxides, and other sulfur-containing compounds. Ash remaining after thermal decomposition may contain cyanide compounds and should not come in contact with acidic condition.
- (c) **Special Protective Equipment / Precautions:** Water spray, dry chemical, or carbon dioxide as appropriate to surroundings.

- Spill:** Collect spilled powder using techniques that minimize powder migration. Clean affected area with soap and water. Dispose of materials according to the applicable federal, state, or local regulations.
- Release to Air:** A system of local and/or general exhaust is recommended to keep employee exposure below the Airborne Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Use explosion-proof equipment.
- This material must be handled in cool, well ventilated low humidity areas.
- Release to Water:** Refer to local water authority. Drain disposal is not recommended; refer to local, state, and federal disposal guidelines.

Section 7 - Handling and Storage

- General Handling:** When handling pharmaceutical products, avoid all contact and inhalation of dust, fumes, mist, and/or vapors associated with the product.
- Storage Conditions:** Store at 20°-25°C (68°-77°F), with excursions permitted between 15° and 30°C (59° and 86°F) prior to reconstitution. [See USP Controlled Room Temperature]. Follow instructions provided in packaging.
