# SAFETY DATA SHEET

#### 1. Identification

**Product identifier Nolvasan Surgical Scrub** 

Other means of identification None.

Recommended use Veterinary product (antimicrobial)

Recommended restrictions Not for human use Manufacturer/Importer/Supplier/Distributor information

Company Name (US) Zoetis Inc.

10 Sylvan Way

1-866-531-8896

1-800-366-5288

Parsippany, New Jersey 07054 (USA)

**Rocky Mountain Poison** 

and Drug Center

**Product Support/Technical** Services

**Emergency telephone** 

numbers

CHEMTREC (24 hours): 1-800-424-9300

International CHEMTREC (24 hours): +1-703-527-3887

International CHEMTREC (24 hours): +1-703-527-3887

Company Name (EU) Zoetis Belgium S.A.

2. Hazard(s) identification

**Physical hazards** Not classified.

**Health hazards** Serious eye damage/eye irritation Category 2A

> Carcinogenicity Category 2 Hazardous to the aquatic environment, acute Category 2

hazard

Hazardous to the aquatic environment, Category 2

long-term hazard

**OSHA** defined hazards Not classified.

Label elements

Signal word Warning

**Hazard statement** Causes serious eye irritation. Suspected of causing cancer. Toxic to aquatic life with long lasting

effects.

**Precautionary statement** 

Prevention Obtain special instructions before use. Do not handle until all safety precautions have been read

and understood. Wash thoroughly after handling. Avoid release to the environment. Wear

protective gloves/protective clothing/eye protection/face protection.

If exposed or concerned: Get medical advice/attention. If in eyes: Rinse cautiously with water for Response

several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye

irritation persists: Get medical advice/attention. Collect spillage.

Store locked up. Storage

**Disposal** Dispose of contents/container in accordance with local/regional/national/international regulations.

Material name: Nolvasan Surgical Scrub

Hazard(s) not otherwise classified (HNOC)

None known.

Supplemental information

Causes mild skin irritation.

## 3. Composition/information on ingredients

#### **Mixtures**

Chemical name	Common name and synonyms	CAS number	%
Laureth-23		9002-92-0	10-20
Propylene glycol		57-55-6	5-10
Chlorhexidine acetate		56-95-1	2
Diethanolamine		111-42-2	<1
FD & C Blue No. 1		3844-45-9	<0.1
Hydrochloric Acid		7647-01-0	** / ##

Composition comments

\*\* to adjust pH / ## Trace

In accordance with 29 CFR 1910.1200, the exact percentage composition of this mixture has been

withheld as a trade secret.

#### 4. First-aid measures

Inhalation

Move to fresh air. Call a physician if symptoms develop or persist. For breathing difficulties, oxygen

may be necessary.

Skin contact

Wash off with soap and water. If skin irritation or rash occurs: Get medical advice/attention. Wash

contaminated clothing before reuse.

Eye contact

Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if

present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion

Rinse mouth. Call a physician or poison control center immediately. Only induce vomiting at the

instruction of medical personnel. Never give anything by mouth to an unconscious person.

Most important

symptoms/effects, acute and

delayed

Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Mild skin irritation.

Indication of immediate medical attention and special treatment needed

Provide general supportive measures and treat symptomatically. Symptoms may be delayed.

**General information** 

IF exposed or concerned: Get medical advice/attention. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. For personal protection, see section 8 of the SDS.

#### 5. Fire-fighting measures

Suitable extinguishing media

Unsuitable extinguishing

media

Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from

the chemical

During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters

Fire fighting equipment/instructions Move containers from fire area if you can do so without risk.

Specific methods

Use standard firefighting procedures and consider the hazards of other involved materials.

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

General fire hazards No unusual fire or explosion hazards noted.

#### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation. Ventilate the contaminated area. Avoid contact with eyes, skin, and clothing. Avoid breathing mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Local authorities should be advised if significant spillages cannot be contained.

Material name: Nolvasan Surgical Scrub

SDS US

Version #: 03 Revision date: 08-30-2019 Issue date: 01-07-2015

# Methods and materials for containment and cleaning up

Ensure adequate ventilation. Wear appropriate protective equipment and clothing during clean-up. Minimize generating airborne mists and vapors. Prevent product from entering drains. Prevent entry into waterways, sewer, basements or confined areas.

Large Spills: Stop the flow of material, if this is without risk. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Clean surface thoroughly to remove residual contamination.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

#### **Environmental precautions**

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS. Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

#### 7. Handling and storage

#### Precautions for safe handling

Do not handle until all safety precautions have been read and understood. Use only with adequate ventilation. Wear appropriate personal protective equipment. Avoid contact with eyes, skin, and clothing. Avoid breathing mist or vapor. Avoid prolonged exposure. Observe good industrial hygiene practices. When using, do not eat, drink or smoke. Wash thoroughly after handling. Avoid release to the environment. Do not empty into drains. Use appropriate container to avoid environmental contamination.

# Conditions for safe storage, including any incompatibilities

Store locked up. Store in tightly closed container in a well-ventilated place. ≤ 25C / 77F. Do not freeze. Keep away from heat, sparks and open flame. Use appropriate container to avoid environmental contamination. Store away from incompatible materials (see Section 10 of the SDS). Keep out of the reach of children.

Value

5 ppm

Form

#### 8. Exposure controls/personal protection

#### Occupational exposure limits

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

US. OSHA	Table Z-1 Limits for A	Air Contaminants	(29 CFR 1910.1000)

Components	Туре	Value
Hydrochloric Acid (CAS 7647-01-0)	Ceiling	7 mg/m3
		5 ppm
UC ACCILI Three held Limit Values		

		Ξ
Components	Туре	
US. ACGIH Threshold Limit Values		

Diethanolamine (CAS 111-42-2)	TWA	1 mg/m3	Inhalable fraction and vapor.
Hydrochloric Acid (CAS 7647-01-0)	Ceiling	2 ppm	

# US. NIOSH: Pocket Guide to Chemical Hazards

US. NIUSH. POCKET Guide to Chemical Hazards				
Components	Туре	Value		
Diethanolamine (CAS 111-42-2)	TWA	15 mg/m3		
		3 ppm		
Hydrochloric Acid (CAS 7647-01-0)	Ceiling	7 mg/m3		

# US. Workplace Environmental Exposure Level (WEEL) Guides

Components	Туре	Value	Form	
Propylene glycol (CAS 57-55-6)	TWA	10 mg/m3	Aerosol.	

#### **Biological limit values**

No biological exposure limits noted for the ingredient(s).

#### **Exposure guidelines**

#### US - California OELs: Skin designation

Diethanolamine (CAS 111-42-2)

Can be absorbed through the skin.

#### US ACGIH Threshold Limit Values: Skin designation

Diethanolamine (CAS 111-42-2)

Can be absorbed through the skin.

Control banding approach

Chlorhexidine acetate: Zoetis OEB 4 (control exposure to the range of 1ug/m3 to <10ug/m3)

Appropriate engineering

controls

Ensure adequate ventilation, especially in confined areas. Keep air contamination levels below the exposure limits or within the OEB range listed above in this section. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide evewash station.

#### Individual protection measures, such as personal protective equipment

Eye/face protection Wear safety glasses with side shields (or goggles).

Skin protection

Wear appropriate chemical resistant gloves. **Hand protection** 

Other Wear suitable protective clothing. Use protective clothing (uniforms, lab coats, disposable

coveralls, etc.) in both production and laboratory areas.

Respiratory protection In case of insufficient ventilation, wear suitable respiratory equipment. If airborne exposures are

within or exceed the Occupational Exposure Band (OEB) range, wear an appropriate respirator with a protection factor sufficient to control exposures to the bottom of the OEB range. Whenever air contamination (mist, vapor or odor) is generated, respiratory protection is recommended as a precaution to minimize exposure. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.

Thermal hazards Not applicable.

General hygiene considerations

Observe any medical surveillance requirements. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

### 9. Physical and chemical properties

Viscous liquid. **Appearance** 

Physical state Liquid. **Form** Liquid. Color Clear. Blue. Odor Pleasant. **Odor threshold** Not available. Ha Not available. Not available. Melting point/freezing point Not available.

## 10. Stability and reactivity

The product is stable and non-reactive under normal conditions of use, storage and transport. Reactivity

Material is stable under normal conditions. Chemical stability Possibility of hazardous Hazardous polymerization does not occur.

reactions

Conditions to avoid Contact with incompatible materials. Keep away from heat, sparks and open flame.

Incompatible materials Strong oxidizing agents. Acids. Bases.

Hazardous decomposition Irritating and/or toxic fumes and gases may be emitted upon the product's decomposition.

products

### 11. Toxicological information

#### Information on likely routes of exposure

Inhalation Health injuries are not known or expected under normal use. Prolonged inhalation may

be harmful.

Hydrochloric Acid Severity: Irritant

Skin contact Causes mild skin irritation. Frequent or prolonged contact may defat and dry the skin,

leading to discomfort and dermatitis.

Diethanolamine Result: Irritant

Hydrochloric Acid Severity: Severe

Chlorhexidine acetate Species: Rabbit

Severity: Mild

Species: Rabbit Propylene glycol

Severity: Mild

Eye contact Causes serious eye irritation.

Diethanolamine Result: Corrosive

Hydrochloric Acid Severity: Severe

Species: Rabbit Propylene glycol

Severity: Mild

Chlorhexidine acetate Species: Rabbit Severity: Severe

May be harmful if swallowed. However, ingestion is not likely to be a primary route of

occupational exposure.

Hydrochloric Acid Severity: Irritant

Symptoms related to the physical, chemical and toxicological characteristics

Ingestion

Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and

blurred vision. Mild skin irritation.

Information on toxicological effects

May be harmful if swallowed. Acute toxicity

sistence and degradability	No data availa	ble for this product.	
accumulative potential	No data availa	ble for this product.	
bility in soil	No data availa	ble for this product.	

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation

potential, endocrine disruption, global warming potential) are expected from this component.

#### 13. Disposal considerations

**Disposal instructions** Avoid release to the environment. Do not discharge into drains, water courses or onto the ground.

Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Considering the relevant known environmental and human health hazards of the material, review and implement appropriate technical and procedural waste water and waste disposal measures to prevent occupational exposure and environmental release. It is recommended that waste minimization be practiced. The best available technology should be utilized to prevent environmental releases. This may include destructive techniques for waste and wastewater. Dispose of contents/container in

accordance with local/regional/national/international regulations.

Local disposal regulations

Dispose in accordance with all applicable regulations.

Hazardous waste code The waste code should be assigned in discussion between the user, the producer and the waste

disposal company.

Waste from residues / unused

products

Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see:

Disposal instructions).

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is

emptied.
