# **SAFETY DATA SHEETS**

# This SDS packet was issued with item: 078936843

The safety data sheets (SDS) in this packet apply to the individual products listed below. Please refer to invoice for specific item number(s).

078947011 078947012 078947014 078947015 078947016

<b>SECTION 1: IDENTIFICATION</b>		
1.1 Product identifier		
Product name		
Chemical name	me carprofen	
Synonyms	C <sub>15</sub> -H <sub>12</sub> -Cl-N-O <sub>2</sub> ; 9H-carbazole-2-acetic acid, 6-chloro-alpha-methyl-, (+/-)-;	
	dl-6-chloro-alpha-methylcarbazole-2-acetic acid; C-5720; Carprofena;	
	Imadyl; Rimadyl; NSAID; anti-inflammatory/ analgesic	
Proper shipping name		
Chemical formula	C <sub>15</sub> -H <sub>12</sub> -Cl-N-O <sub>2</sub>	
Other means of identification	n Not Available	
CAS number	53716-49-7	
1.2 Relevant identified uses of the	e substances or mixture and uses advised against	
Recommended uses	For the relief of pain and inflammation associated with osteoarthritis and for	
	the control of postoperative pain associated with soft tissue and orthopedic	
	surgeries in dogs; for professional use only. Federal law restricts this drug	
	to be used by or on a order of a licensed veterinarian.	
	This SDS is written to address potential worker health and safety issues	
	associated with the handling of the mixture	
1.3 Details of the supplier of the s		
Registered company name (US)		
Address	7015 College Blvd Suite 525	
	Overland Park KS 66211 USA	
Telephone	866-933-2472	
	Not Available	
Email	Not Available	
1.4 Emergency telephone numbe	rs	
Dechra (US)	866-933-2472	

	the substance or mixture eet according to OSHA HazCom Standard (2012) requirements (GHS.USA)	
	pet according to OSHA HazCom Standard (2012) requirements (GHS USA)	
NFPA 704 diamond	set according to COTA Hazoom Standard (2012) requirements (GHS.00A)	
	e: The hazard category numbers found in GHS classification insection 2 of this SDSs are NOT to used to fill in the NFPA 704 diamond. Blue = Health Red = Fire Yellow = Reactivity White = Special	
	idizer or water reactive substances)	
Env	Acute Toxicity (Oral) Category 3, Sensitisation (Skin) Category 1, Hazardous to the Aquatic Environment Long-Term Hazard Category 2	
2.2 Label elements		
Hazard pictogram(s)		
Signal word Dar	nger	
Hazard statement(s)		
H301 Tox	ric if swallowed.	
H317 May	/ May cause an allergic skin reaction.	
H411 Tox	H411 Toxic to aquatic life with long lasting effects.	
Hazard(s) not otherwise classified Not Applicable		
Precautionary statem	nent(s) prevention	
	sh all exposed external body areas thoroughly after handling.	
P270 Do	not eat, drink or smoke when using this product.	
P280 We	ar protective gloves and protective clothing.	

P261	Avoid breathing dust/fumes.		
P273	Avoid release to the environment.		
P272	Contaminated work clothing must not be allowed out of the workplace.		
Precautionary statement(s) response			
P301+P310	IF SWALLOWED: Immediately call a POISON CENTER/doctor/physician/first aider.		
P330	Rinse mouth.		
P302+P352	IF ON SKIN: Wash with plenty of water.		
P333+P313	If skin irritation or rash occurs: Get medical advice/attention.		
P362+P364	Take off contaminated clothing and wash it before reuse.		
P391	Collect spillage.		
Precautionary statement(s) storage			
P405	Store locked up.		
Precautionary sta	Precautionary statement(s) disposal		
P501	Dispose of contents/container to authorised hazardous or special waste collection point in		
	accordance with any local regulation.		

#### **SECTION 3: INFORMATION ON THE INGREDIENTS**

3.1 Substances			
CAS No.	% [weight]	Name	
53716-49-7	>98	<u>carprofen</u>	

See section above for composition of Substances.

#### **SECTION 4: FIRST AID MEASURES**

4.1 Description of first aid measures			
Eye	Immediately flush eyes with copious quantities of water for at least 15 minutes. If irritation occurs or		
contact	persists, notify medical personnel and supervisor.		
Skin	Immediately remove all contaminated clothing, including footwear. Wash exposed area with soap		
contact	and water and remove contaminated clothing/shoes. If irritation occurs or persists, notify medical		
	personnel and supervisor.		
Inhalation	Immediately move exposed subject to fresh air. Immediately notify medical personnel and supervisor.		
Ingestion	If swallowed, call a physician immediately. Wash out the mouth with water and notify medical		
_	personnel and supervisor.		
4.2 Most in	4.2 Most important symptoms and effects, both acute and delayed		
See s	See section 11		
4.3 Indication of immediate medical attention and special treatment needed			
Treat symptomatically			

### **SECTION 5: FIRE FIGHTING MEASURES**

#### 5.1 Extinguishing media Use foam, dry chemical powder, BCF (where regulations permit), carbon dioxide or water spray or fog large fires only 5.2 Special hazards arising from the substance or mixture Fire Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, incompatibility pool chlorine etc. as ignition may result 5.3 Special protective actions for fire-fighters: Firefighting Wear full body protective clothing with breathing apparatus. Prevent, by any means available, spillage from entering drains or water course. Use fire fighting procedures suitable for surrounding area.. DO NOT approach containers suspected to be hot. Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire. Fire / explosion Product itself is not explosive, but dust clouds suspended in are can be explosive. hazard Hazardous conditions will not occur under normal conditions. Combustion products include: carbon monoxide, carbon dioxide, hydrogen chloride, phosgene, nitrogen oxides and other pyrolysis products typical of burning organic material. May emit poisonous fumes.

SECTION 6: ACCIDENTAL RELEASE MEASURES				
6.1 Personal precautions, protective equipment and emergency procedures				
-	See Section 8			
6.2 Environmenta	6.2 Environmental precautions			
See Section 12				
6.3 Methods and material for containment and cleaning up				
Minor spills	with skin and eyes. Wear protective clothing, gloves, safety glasses and dust respirator. Use dry clean up procedures and avoid generating dust. Vacuum up or sweep up. <b>NOTE:</b> Vacuum cleaner must be fitted with an exhaust micro filter (HEPA type) (consider explosion- proof machines designed to be grounded during storage and use). Dampen with water to prevent dusting before sweeping. Place in suitable containers for disposal.			
Major spills	Clear area of personnel and move upwind. Alert Fire Brigade and tell them location and nature of hazard. Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or water course. Stop leak if safe to do so. Contain spill with sand, earth or vermiculite. Collect solid residues and seal in labelled drums for disposal. Wash area and prevent runoff into drains.			
Personal Protective Equipment advice is contained in Section 8.				

7.1 Precautions for safe handling			
Safe handling	exposure occurs. Use in a well-ventilated area. <b>DO NOT</b> enter confined spaces until atmosphere has been checked. <b>DO NOT</b> allow material to contact humans, exposed food or food utensils. Avoid contact with incompatible materials. When handling, <b>DO NOT</b> eat, drink or smoke. Keep containers securely sealed when not in use. Avoid physical damage to containers.		
Other			
information			
	good industrial hygiene and safety procedures. Avoid contact with eyes, skin and clothing.		
	Avoid breathing dust. Use appropriate personal protective equipment when handling and observe good personal hygiene measures after handling.		
7.2 Conditions for safe storage, including any incompatibilities			
Suitable	Comply with applicable regulations. Store in a dry, cool and well-ventilated place. Keep		
container	container closed when not in use. Keep/Store away from direct sunlight, extremely high or low		
	temperatures and incompatible materials.		
Storage	Avoid reaction with oxidising agents.		
incompatibility			

		RE CON	TROLS / PERSONAL PROTE	CTION

Ingredient			TEEL-1	TEEL-2	TEEL-3
CARPROFEN		Not Available	Not Available	Not Available	
Ingredient Original IDLH Revised IDLH					
carprofen			Not Available	Not Available	
Occupa	tional Exposure	Bandin	g		
			ational Exposure Band Rating Occupational Exposure Band		Band Limit
carprofe	n	E		≤ 0.01 mg/m <sup>3</sup>	
Notes:	Occupational exposure banding is a process of assigning chemicals into specific categories or bands based on a chemical'spotency and the adverse health outcomes associated with exposure. The output of this process is an occupational exposure band (OEB), which corresponds to a range of exposure concentrations that are expected to protect worker health.				

MATERIAL DATA Airborne particulate or vapour must be kept to levels as low as is practicably achievable given access to modern engineering controls and monitoring hardware. Biologically active compounds may produce idiosyncratic effects which are entirely unpredictable on the basis of literature searches and prior clinical experience (both recent and past).			
8.2 Exposure contro			
Appropriate	Avoid creating or spreading dust. Ensure adequate ventilation, especially in confined		
engineering	areas. Emergency eye wash fountains and safety showers should be available in the		
controls			
Personal protection			
Eye and face	When handling very small quantities of the material eye protection may not be required.		
protection	For laboratory, larger scale or bulk handling or where regular exposure in an occupational setting occurs: chemical goggles, face shield, full face shield may be required. Contact lenses may pose a special hazard.		
Skin protection	See Hand protection below.		
Hands/feet	In laboratory, medical or industrial settings, impervious disposable gloves and protective		
protection			
Body protection			
Other protection	n For quantities up to 500 grams a laboratory coat may be suitable. For quantities up to 1 kilogram a disposable laboratory coat or coverall of low permeability is recommended. Coveralls should be buttoned at collar and cuffs. For quantities over 1 kilogram and manufacturing operations, wear disposable coverall of low permeability and disposable shoe covers. For manufacturing operations, air-supplied full body suits may be required for the provision of advanced respiratory protection. Eye wash unit. Ensure there is ready access to an emergency shower. For Emergencies: Vinyl suit.		
Respiratory protection	When manufacturing or handling product in large quantities and dusts or particulates may be generated, maintain airborne concentrations below recommended limits. Workplace risk assessments should be completed before specifying and implementing respirator usage. NIOSH/MSHA approved respirators for protection should be used if found to be necessary. Particulate. (AS/NZS 1716 & 1715, EN 143:2000 & 149:001, ANSI Z88 or national equivalent).		

## SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties		
Appearance: Solid	Vapor density: NA	
Physical state: Solid	Auto ignition temperature (degrees C): NA	
Odor: Not Available	Decomposition temperature (degrees C): NA	
Odor threshold: NA	Viscosity (degrees C): NA	
pH (as supplied): NA	Explosive properties: NA	
Melting point / freezing point (degrees C): NA	Oxidizing properties: NA	
Initial boiling point and boiling range: NA	Partition coefficient: NA	
Flash point: NA	Molecular weight: 273.73	
Evaporation rate: NA	Taste: NA	
Flammability: Flammable	Surface tension: NA	
Upper/lower flammability or explosive limits: NA	Volatile component (%vol): NA	
Vapor pressure: NA	Gas group: NA	
Relative density (at degrees C): NA	pH as a solution: NA	
Solubility in water (mg/l): Partly miscible	VOC g/L: NA	
	Specific gravity @ 20 degrees C (water = 1): NA	

10: STABILITY AND REACTIVITY		
Reactivity	See Section 7	
Chemical stability	Product is considered stable. Hazardous polymerization will not occur.	
	Unstable in the presence of incompatible materials	
Possibility of hazardous reactions	See Section 7	
Conditions to avoid	See Section 7	
Incompatible materials	See Section 7	
Hazardous composition	See Section 5	

Inhalation The material is not thought to produce respiratory irritation (as classified by EC Dire			rective		
initiation	using animal models). Nevertheless inhalation of dusts, or fumes, especially for prolonged periods, may produce respiratory discomfort and occasionally, distress. Inhalation of dusts, generated by the material during the course of normal handling, may be damaging to the health				
	of the individual.				
Ingestion	Toxic effects may result from the accidental ingestion of the material; animal experiments indicate that ingestion of less than 40 gram may be fatal or may produce serious damage to the health of the individual.				
Skin contact	The material is not thought to be a skin irritant (as classified by EC Directives using animal models). Abrasive damage however, may result from prolonged exposures. Good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting.				
Eye contact	Although the material is not thought to be an irritant (as classified by EC Directives), direct contact with the eye may cause transient discomfort characterised by tearing or conjunctiva redness. Slight abrasive damage may also result. The material may produce foreign body irritation in certain individuals.				
Chronic	Practical experience shows that skin contact with the material is capable either of inducing a sensitisation reaction in a substantial number of individuals. There is some evidence that humar exposure to the material may result in developmental toxicity. Long term exposure to high dus concentrations may cause changes in lung function (i.e. pneumoconiosis) caused by particles less than 0.5 micron penetrating and remaining in the lung.				
,	Acute toxicity

٦

Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. DO NOT allow product to come in contact with surface waters or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment wash-waters. Wastes resulting from use of the product must be disposed of on site or at approved waste sites.

#### DO NOT discharge into sewer or waterways. 12.2 Persistence and degradability

Ingredient	Persistence: Water/Soil	Persistence: Air	
carprofen	HIGH	HIGH	
12.3 Bioaccumulative potential		· · · · ·	
Ingredient	Bioaccumulation		
carprofen	LOW (LogKOW = 3.7888)		
12.4 Mobility in soil			
Ingredient	Mobility		
carprofen	LOW (KOC = 816.3)		

# SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods			
Product/ packaging	Disposal of the material must be carried out in accordance with the requirements of the		
disposal	relevant Federal/State Act(s) or Code(s) regulating the disposal of Drugs of Addiction.		
	<b>DO NOT</b> allow wash water from cleaning or process equipment to enter drains.		

SECTION 14: TRANSPORT INFORMATION

Mexico - INSQ	No (carprofen)	
Vietnam - NCI	Yes	
Russia - FBEPH	No (carprofen)	
Yes = All CAS declared ingredients are on the inventory		

No = One or more of the CAS listed ingredients are not on the inventory. These ingredients may be exempt or will require registration

# **SECTION 16: OTHER INFORMATION**

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.
